

Design System Specification: Ruta Nómada

This document establishes the official Design System guidelines for **Ruta Nómada**. It contains explicit rules for color application, typographic hierarchy, and UI component behavior to be interpreted by AI design tools for generating high-fidelity mockups.

1. Core Visual Identity & Principles

- **Design Vibe:** Organic, adventurous, yet deeply structured and reliable. It bridges the emotional appeal of travel with the mathematical precision of a financial management tool.
- **Background Strategy:** Avoid harsh pure whites (**#FFFFFF**) for large surfaces. Use the warm, sand-like properties of the Barley scale to give a premium, editorial travel feel.
- **Accessibility Rule:** All interactive elements, textual content, and indicators must strictly adhere to WCAG AA contrast standards using the curated color steps.

2. Color Token System

The color palette is divided into functional scales based on custom monochromatic tokens:

Color Tokens Table

Scale Name	Token	Hex Value	Primary UI Role / Application
RINO (Dominant)	--rino-100	#071820	Main body copy text, high-contrast inputs.
	--rino-200	#0C2937	Secondary text, headers inside semantic cards.
	--rino-300	#10384C	Section subtitles (h2), heavy component borders.

	--rino-400	#1B475D	Brand Base: Layout wrappers, Navbars, Footers.
	--rino-500	#47768D	Subdued borders, inactive states, icons.
	--rino-600	#88ACBE	Hover states for dark elements, placeholder text.
	--rino-700	#CEDEE6	Subtle accents, table headers background tint.
BARLEY (Surface)	--barley-400	#FFF5D0	Surface Base: Main global application canvas background.
	--barley-500	#FFF8DE	Secondary structural section blocks background.
	--barley-600	#FFFBEC	Cards background surface, inner container panels.
	--barley-700	#FFFD7	Highest luminance light background variant.
NAPLES (Action)	--naples-100	#573E11	Text color for primary buttons (ensures contrast).

		--naples-400	#FAD564	Action Base: Primary CTAs (<i>Book Now, Start Plan</i>).
LIGHT (Status)	OLIVE	--olive-400	#B4BD62	Status Base: <i>Economic Plan</i> token, success badges.
NEPTUNE Accent)	(Soft	--neptune-400	#8EBD9D	Accent Base: Secondary buttons, interactive map borders.
		--neptune-700	#EBF5EE	Financial breakdown panels, code block backgrounds.

3. Typography & Typesetting Rules

Typographic Hierarchy Table

Element	Font Family	Weight	Size	Line Height	Color Token	Application Context
<h1>	Noto Serif	700 (Bold)	2.5rem (~40px)	1.2	--rino-400	Main destination page headings.
<h2>	Noto Serif	700 (Bold)	2.0rem (~32px)	1.3	--rino-300	Core section headers (e.g., <i>Mis Planes</i>).
<h3>	Noto Serif	600 (Semi)	1.5rem (~24px)	1.4	--rino-200	Feature cards, promotional bundles.

<h4>	Inter	600 (Semi)	1.25rem (~20px)	1.4	--rino-100	Form block titles, modal card headers.
<p>	Inter	400 (Reg)	1.0rem (~16px)	1.6	--rino-100	Destination copy, blog text (Justified).
.data	Source Code Pro	500 (Med)	0.95rem (~15px)	Default	--rino-200	Monospace numerical data, codes, dates.

Typesetting Note: Parárfos (<p>) must have their text fully justified. To prevent ugly spacing gaps on web rendering, a generous line-height of 1.6 must be strictly maintained.

4. UI Component Specifications

A. Layout Blocks (Navbar & Footer)

- **Background Color:** --rino-400 (Solid Deep Slate Blue).
- **Text & Icon Color:** --barley-400 or white for maximum contrast.
- **Active States:** Underline or font-weight shift utilizing --naples-400.

B. Interactive Buttons

- **Primary Call to Action (CTA):**
 - *Background:* --naples-400.
 - *Text:* Inter 600, Color: --naples-100.
- **Secondary Buttons:**
 - *Background:* --neptune-400.
 - *Text:* Inter 600, Color: --rino-100.

C. Content Cards (Destinations & Packages)

- **Container Surface:** Background color set to --barley-600.
- **Border:** 1px solid --barley-300 to smoothly isolate sections.
- **Headers inside Cards:** Must use Noto Serif (h3) with --rino-200 color formatting.

D. Financial Data Badges (Expense Splitter / Currency Conversions)

- **Font Engine:** `Source Code Pro` (Monospace) to guarantee uniform vertical alignment of decimal points across matrices.
- **Class Mapping:** Apply style tokens `.ticket-code`, `.currency-value`, and `.date-badge`.
- **Visual Treatment:** * *Background Tint:* `--neptune-700`.
 - *Text Color:* `--rino-200`.
 - *Spacing:* Inside padding of `2px 6px` with a slight `border-radius: 4px`.

E. Form Fields & Text Inputs

- **Label Typography:** `Inter 500` or `600`, Size: `0.875rem`, Color: `--rino-200`.
- **Input Box Field:** Background `--barley-700`, text input `Inter 400` Color: `--rino-100`.
- **Active / Focus Border:** `1.5px` solid `--neptune-400`.

5. UI Layout Structure Rules

- **Global App Background:** Set the HTML/Body viewport canvas wrapper completely to `--barley-400`.
- **Spacers and Padding:** Standard layout gutters must map to multiples of `8px` (`8px`, `16px`, `24px`, `32px`, `48px`) to ensure clean grid rendering.
- **Modals & Overlays Background:** Dark semi-transparent backdrops blocking background elements during a cancellation prompt must utilize a color layer derived from a transparent mix of `--rino-100`.
